

UCARE Podcast "All things urticaria"

Published Episodes	Speaker	Speakers Country	Publication Date	Content Resumé	Nr
Episode 0: Introduction/What is All Things Urticaria?	Marcus Maurer	Germany	01.10.2020	Introduction/What is All Things Urticaria?	0
Episode 1: Who cares? UCARE	Ana Gimenez-Arnau	Spain	01.10.2020	Professor Marcus Maurer is joined by UCARE cofounder, Professor Ana Giménez-Arnau, to discuss the history of the UCARE network and offer practical advice to those seeking to become a member.	1
Episode 2: Getting a grip on itch	Martin Metz	Germany	01.10.2020	Professor Marcus Maurer is joined by itch expert, Professor Martin Metz, who explains that itch is much more than just “the little brother of pain” and describes the research that is currently underway to improve our understanding of this debilitating symptom.	2
Episode 3: Improving patients care with PROMs	Karsten Weller	Germany	01.10.2020	Professor Marcus Maurer is joined by Patient-reported outcome measures (PROMs) expert, Professor Karsten Weller, who explains that while such tools are essential to improve the management of urticaria, they can be challenging to develop.	3
Episode 4: Sweat it out	Sabine Altrichter	Germany	30.10.2020	In cholinergic urticaria, symptoms may arise as a result any activity that induces sweating. In this episode, Professor Marcus Maurer is joined by cholinergic urticaria expert, Dr Sabine Altrichter, who provides insight into what is currently known about this debilitating condition.	4
Episode 5: Cold Urticaria: The Future is Bright	Dorothea Therhorst-Molawi	Germany	03.11.2020	Cold urticaria expert, Dr Dorothea Terhorst-Molawi, and host, Professor Marcus Maurer, discuss the complexities of this highly heterogenous condition and explain why they are optimistic about what the future holds for those affected.	5
Episode 6: The Guideline Guru	Torsten Zuberbier	Germany	24.11.2020	With the sixth consensus meeting on the EAACI/GA2LEN/EDF/WAO guideline for urticaria fast approaching, Professor Marcus Maurer is joined by Professor Torsten Zuberbier, who explains what you can expect from this new edition.	6

Episode 7: Beating the Burden of Chronic Urticaria	Luis Felipe Ensina	Brazil	08.12.2020	Professor Marcus Maurer is joined by “UCARE father”, Dr Luis Felipe Ensina, to discuss the frequently underestimated burden of urticaria, which Dr Ensina explains is not limited to the patients themselves, but may indirectly impact numerous friends and family members as well.	7
Episode 8: Histamine, antihistamines, and the future of urticariology	Martin Church	UK	22.12.2020	Professor Martin Church reflects on the enormous progress that has been made in the field of urticariology and discusses what is yet to come for patients with this devastating disease.	8
Episode 9: Chronic Urticaria in Pregnancy and COVID-CU	Emek Kocatürk Göncü	Turkey	05.01.2021	Professor Marcus Maurer is joined by Dr Emek Kocatürk Göncü who addresses concerns regarding the impact of COVID-19 infection in patients with chronic urticaria and summarises the results of the recent UCARE project, PREG-CU.	9
Episode 10: All thing Angioedema	Markus Magerl	Germany	19.01.2021	Angioedema expert and ACARE founding father, Professor Markus Magerl, joins Professor Marcus Maurer to discuss all things angioedema and get the latest on the ever-growing ACARE network.	10
Episode 11: When doctor becomes patient	Jorge Sánchez	Colombia	02.02.2021	Dr Jorge Sánchez reflects on how it felt to give himself urticaria and explains what his bold experiment has taught us about the role of anti-TPO IgE in this disease.	11
Episode 12: : Mastocytosis, MCAS and Beyond the Skin in CSU	Frank Siebenhaar	Germany	16.02.2021	Dr Frank Siebenhaar brings us up to date on the differences between mastocytosis, urticaria and mast cell activation syndrome (MCAS). He also introduces CSUplus, an ongoing UCARE project that aims to shed light on the extracutaneous symptoms of chronic spontaneous urticaria.	12
Episode 13: Symptomatic Dermographism	Thomasz Hawro	Germany	02.03.2021	Despite affecting up to 5% of the population, symptomatic dermographism remains understudied. Discover more about how our ability to diagnose and treat this common and debilitating condition is improving from urticaria expert, Dr Tomasz Hawro.	13

Episode 14: COLD-CE: Insights from a UCARE Project	Mojca Bizjak	Slovenia	16.03.2021	Since its inception in 2018, COLD-CE has collected data on hundreds of patients with cold urticaria from around the world. In this episode, Dr Mojca Bizjak reflects on her experience of running a UCARE project, offering insight and advice for those hoping to do so in the future.	14
Episode 15: All Things UCARE	Kanokvalai Kulthanan	Thailand	12.05.2021	For those just starting out on their UCARE journey, the extensive list of criteria can seem daunting. In this episode, our host is joined by Professor Kanokvalai Kulthanan, who offers her advice on tackling the application process.	15
Episode 16: Exploring the CSU spectrum: pure angioedema	Connie Katelaris	Australia	25.05.2021	Did you know that not all patients with CSU develop wheals? In this episode, Professor Connie Katelaris explains the unique challenges physicians face when diagnosing and managing CSU patients who have pure angioedema without wheals, and offers advice on how to spot pseudoangioedema.	16
Episode 17: Acute urticaria – not so cute after all?	Angèle Soria	France	08.06.2021	Did you know 12-20% of the population will experience acute urticaria sometime in their lifetime? In this episode, Dr Angèle Soria explains the differences between acute urticaria and other urticarias, how to manage the condition and what to look out for and highlights her most recent publication.	17
Episode 18: The Patient Voice	Casandra Pope	UK	22.06.2021	In this very special episode, our host meets Cassandra, a patient who has been affected by CSU for many years. Listen now for unmissable insights into the patient experience and to find out more about what you do to better support your own patients in the future.	18
Episode 19: Unanswered Questions in CSU	Clive Grattan	UK	06.07.2021	In this episode, our host is joined by UK-based dermatologist Dr Clive Grattan to address some of the most important unanswered questions in the field of chronic spontaneous urticaria.	19
Episode 20: Urticaria in children	Moshe Ben-Shoshan	Canada	20.07.2021	In this episode, our host is joined by Dr Moshe Ben-Shoshan, who shares his pioneering approach to treating paediatric patients and draws on his experience to debunk some of the common myths surrounding childhood urticaria.	20

Episode 21: Let's talk comorbidities	Simon Francis Thomsen	Denmark	03.08.2021	How do comorbidities affect patients with chronic spontaneous urticaria and what can be done to minimise their impact? Find out more on this crucial, yet understudied topic from our latest guest, Dr Simon Francis Thomsen.	21
Episode 22: What's new in CU?	Young-Min Ye	Korea	17.08.2021	In this episode, Dr Young-Min Ye shares the findings of her cutting-edge research into predictors of remission in chronic urticaria, and explains what is currently known about the role of Mas-related G protein coupled receptor X2 (MRGPRX2) in the activation of mast cells.	22
Episode 23: The Truth About T Cells	Elias Toubi	Israel	01.09.2021	Could targeting cytokines produced by autoreactive T cells benefit patients with chronic spontaneous urticaria (CSU)? Professor Marcus Maurer is joined by Professor Elias Toubi to discuss the role of T cells in CSU.	23
Episode 24: Communication technology meets urticariology	Ivan Chérrez Ojeda	Ecuador	14.09.2021	In this episode, our host is joined by Dr Ivan Chérrez Ojeda, an urticariologist and communication technology enthusiast, to discuss the potential application of telemedicine in the management of patients with chronic urticaria.	24
Episode 25: Improving sleep quality in urticaria: more than just a dream?	Caroline Mann	Germany	28.09.2021	In this episode, our host is joined by Dr Caroline Mann, an urticariologist and sleep expert, who highlights the profound impact of sleep disturbance on quality of life in patients with urticaria and explains what can be done to address this common, but often overlooked aspect of the disease.	25
Episode 26: All Things ACARE	Anete Grumach	Brazil	12.10.2021	Are you familiar with Angioedema Centers of Reference and Excellence (ACARE)? In this episode, our host is joined by Dr Anete Grumach, to celebrate the recent successes of the ACARE network and discuss the future of this exciting initiative.	26

Episode 27: Gender differences in chronic urticaria	Laurence Boulliet	France	26.10.2021	It is well known that chronic urticaria is more common in women than men, but why is this the case? In this episode, our expert guest, Professor Laurence Boulliet, explores gender-based differences in this disease.	27
Episode 28: The pathogenesis of chronic spontaneous urticaria, when will we have a cure?	Riccardo Asero	Italy	09.11.2021	Does our current understanding of the pathogenesis of CSU provide hope of a cure for this challenging disease? Find out what Dr Riccardo Asero has to say as he joins our host to discuss some of the most fundamental questions in the field of urticariology.	28
Episode 29: Paediatric Urticaria – Challenges and Solutions	Petra Staubach-Renz	Germany	23.11.2021	In this episode, paediatric urticaria expert and UCARE driving force, Professor Petra Staubach-Renz reflects on her experience of treating children with chronic urticaria and calls for more research into this important yet understudied group of patients.	29
Episode 30: Shining a Light on Solar Urticaria	Lesley Rhodes	UK	07.12.2021	In this episode, photodermatology expert, Professor Lesley Rhodes, sheds light on one of the rarer forms of chronic inducible urticaria: solar urticaria. This includes a practical guide to diagnosis and referral, as well as a summary of the unmet needs that remain in the management of this understudied condition.	30
Episode 31: The Role of PAF and Urticaria in Adults	Ana Gimenez-Arnau	Spain	21.12.2021	In this episode, Dr Ana Gimenez discusses new insights into the pathology of chronic urticaria and how these insights can help guide treatment decisions. Dr Gimenez discusses the inflammatory mediators relevant in chronic urticaria, with a particular focus on platelet-activating factor (PAF). She describes the role of PAF, its contribution to the development of signs and symptoms of chronic urticaria, and why she considers PAF an important consideration in chronic spontaneous urticaria.	31

Episode 32: UCARE LevelUp	Iman Nasr	Oman	05.01.2022	In this episode, Dr Iman Nasr discusses UCARE LevelUp, an educational program devised by the UCARE network to allow healthcare professionals to learn, network and share best clinical practices in chronic urticaria. Dr Nasr also touches on UCARE 4U, the UCARE patient information and education platform and programme.	32
Episode 33: Paediatric Urticaria - Current Practice and Future Prospects	Vicky Xepapadaki	Greece	18.01.2022	Dr Vicky Xepapadaki joins the podcast to share her knowledge of paediatric urticaria, including current treatment strategies and unmet needs.	33
Episode 34 - Improving urticaria education: an international perspective	Désirée Larenas-Linnemann	Mexico	01.02.2022	In this episode, Dr Désirée Larenas-Linnemann joins our host to discuss the importance of providing better education on urticaria for patients and physicians around the world. Dr Larenas-Linnemann also highlights international differences in educational needs and the role of UCARE programmes in addressing these.	34
Episode 35 - CRUSE CONTROL: A Chronic Urticaria Self-Evaluation App	Sophia Neisinger	Germany	22.02.2022	In this episode, Dr Sophia Neisinger joins the podcast to introduce the CRUSE CONTROL app, which has been developed to help support chronic spontaneous urticaria self-evaluation and aims to improve patient quality of life.	35
Episode 36: Are you CSU aware?	Christian Vestergaard	Denmark	10.03.2022	In this episode, our host is joined by Dr Christian Vestergaard, who offers expert insight into the results of the AWARE study and highlights the urgent need for wider dissemination of the guidelines for CSU management.	36
Episode 37: UCARE Behind the Scenes Special (Part 1)	UCARE office Team: Laura Schwenner, Julia Föll, Reinhardt Britz, Rebekka Locke	Germany	29.03.2022	In this very special two-part episode, Professor Marcus Maurer is joined by not one, but four of his UCARE office colleagues to give listeners exclusive insight into the inner workings of the UCARE network, including advice on how to become a UCARE centre and updates on exciting new UCARE initiatives.	37

Episode 38: UCARE Behind the Scenes Special (Part 2)	UCARE office Team: Laura Schwenner, Julia Föll, Reinhardt Britz, Rebekka Locke	Germany	05.04.2022	In part two of this very special episode, Professor Marcus Maurer is joined once again by his colleagues from the UCARE office to discuss the UCARE LevelUp and UCARE 4U programmes, which aim to inform and educate patients and physicians on the management of chronic urticaria. To find out more information on UCARE, please visit ga2len-ucare.com .	38
Episode 39: Chronic Urticaria: A North American Perspective	Jonathan Bernstein	USA	19.04.2022	Professor Jonathan Bernstein joins the podcast to discuss chronic urticaria (CU) care in the USA. In this episode, Professor Bernstein shines a light on the challenges faced by US-based physicians and highlights the potential benefits of conducting further research into the diverse population living with CU in North America.	39
Episode 40: Chronic Urticaria: An Indian Perspective	Kiran Godse	India	16.05.2022	In this episode, our host is joined by Professor Kiran Godse who shares his experiences of treating CSU in India. Professor Godse provides unmissable insights into the practicalities of CSU care, including economic considerations, as well as his plans to increase the UCARE network's presence in India and facilitate wider dissemination of educational resources.	40
Episode 41: Chronic Urticaria: A Middle Eastern Perspective	Mona Al-Ahmad	Kuwait	31.05.2022	Dr Mona Al-Ahmad joins the podcast from the UCARE centre in Kuwait to share her insights into the UCARE network's Middle Eastern activities. Dr Al-Ahmad also takes time to reflect on what more can be done to improve the lives of people living with chronic urticaria and those caring for them.	41
Episode 42: Chronic Urticaria: A Latin American Perspective	Maximiliano Gómez	Peru	06.06.2022	In this episode, Dr Maximiliano Gómez shares his tips and tricks for improving the diagnosis and management of chronic urticaria and calls for wider dissemination of good quality information to patients living in Argentina and beyond.	42

Episode 43: Chronic Urticaria: A South-African Perspective	Jonny Peters	South Africa	21.06.2022	Hear Associate Professor Jonathan Peter (Division of Allergy and Clinical Immunology, Department of Medicine, University of Cape Town, South Africa; Allergy and Immunology Unit, University of Cape Town Lung Institute, South Africa) explain regional differences in urticaria in South Africa, with a focus on epidemiology, patient beliefs and education, and the CRUSE App	43
Episode 44: COVID 19 Vaccinations	Emek Kocatürk Göncü	Turkey	05.07.2022	Prof. Emek Kocatürk joins Professor Marcus Mauer in this episode of All Things Urticaria to discuss the effects of the COVID 19 pandemic on CSU patients, and how COVID 19 vaccines impacted the exasperation of chronic spontaneous urticaria as part of the COVAC-CU study.	44
Episode 45: Chronic Urticaria: A Turkish Perspective	Murat Türk and Ragıp Ertuş (ragipertas@gmail.com)	Turkey	03.08.2022	Professor Marcus Mauer is joined by Dr Murat Türk and Dr Ragıp Ertuş of UCARE in Turkey to discuss advancements in the treatments of urticaria, with a special focus on the implementation of artificial intelligence and machine learning.	45
Episode 46: Chronic Urticaria: A Chinese Perspective	Zuotao Zhao	China	26.08.2022	During this episode, Professor Marcus Mauer is joined by Dr Zuotao Zhao of Beijing Medical University, China, to discuss the growing problem of chronic spontaneous urticaria within the Chinese population and delve into possible causes of such a high incidence.	46
Episode 47: Chronic Urticaria and Systemic Auto-Inflammatory Syndromes	Sinisa Savic	UK	07.09.2022	Dr Sinisa Savic joins Professor Dr Marcus Maurer in this podcast to discuss chronic urticarias and systemic auto-inflammatory syndromes, delving into differential diagnostic techniques and utilisation of genetics to determine causation of clinical presentations.	47
Episode 48: Patient advocacy and seeing through the patient's eyes	Elaine Dery	Canada	22.09.2022	In this episode Professor Marcus Maurer is joined by patient and patient advocate Elaine, who experiences chronic urticaria. She highlights the importance of connecting patients with each other, and discusses the opportunities that arise when patients work together with healthcare professionals.	48

Episode 49: Psycho-neurodermatology in chronic urticaria and mental health	Anna Zalewska-Janowska	Poland	01.11.2022	Professor Anna Zalewska-Janowska joins Professor Maurer to delve into fascinating area of psycho-neurodermatology and how this	49
Episode 50: The Development of Treating Urticaria over the last two decades	Luis Felipe Ensina	Brazil	15.11.2022	Professor Marcus Maurer is joined by Professor Luis Felipe Ensina where they discuss the founding days of urticaria treatment, and how urticaria clinics became available. Professor Maurer and Professor Ensina discussed how the treatment landscape, diagnostic techniques and further developments in the advancement of how clinicians treat patients with urticaria have evolved over the last two decades.	50
Episode 51: Chronic Spontaneous Urticaria: Never Give Up	Silvia Ferrucci	Italy	29.11.2022	In this episode, Professor Silvia Ferrucci joins Professor Marcus Maurer in discussing what the phrase 'Never Give Up' means to physicians treating urticaria, and for patients embarking on their treatment journey. Areas of special focus are given to guideline treatment algorithms and the implementation of the CRUSE app and Chronic Urticaria Registry (CURE) as tools to shift the balance of treating urticaria	51
Episode 52: Drug Survivability of Omalizumab in Chronic Urticaria	Heike Röckmann	Netherlands	12.12.2022	Dr Heike Röckmann, head of the drug survivability of omalizumab in chronic urticaria (DruSO-CU) project joins Professor Marcus Maurer to discuss the global project, the difficulties which were encountered, and how the UCARE network helped overcome these challenges. The focus of this podcast is on the importance of identifying the data in this important project.	52
Episode 53: Recurrent Angioedema in Chronic Spontaneous Urticaria	Asli Gelincik	Turkey	09.01.2023	Professor Marcus Maurer is joined by Professor Asli Gelincik as they discuss recurrent angioedema in chronic spontaneous urticaria, and treatment options which are currently available to alleviate this pathology. The mechanistic actions of mast cell-mediated angioedema and bradykinin-mediated angioedema are discussed and their implications are analysed.	53

Episode 54: Mast Cell Involvement in Chronic Spontaneous Urticaria	Yoshimichi Okayama	Japan	24.01.2023	Professor Yoshimichi Okayama joins Professor Marcus Maurer to discuss the role which mast cells play in the disease aetiology of chronic spontaneous urticaria. In particular, the discussion focuses on mast cell receptors and how they can be utilised in the diagnosis of CSU.	54
Episode 55: Delayed Pressure Urticaria in the CSU Landscape	Alicja Kasperska-Zajac	Poland	08.02.2023	Professor Alicja Kasperska-Zajac joins Professor Marcus Maurer to discuss a rare form of chronic inducible urticaria – delayed pressure urticaria. The discussion highlights the difficulties in undertaking differential diagnosis and the main differences when compared to chronic spontaneous urticaria, namely the absence of oedema and wheals.	55
Episode 56: Gut microbiome and Chronic Spontaneous Urticaria	Jie Li (xyljlie@csu.edu.cn)	China	23.02.2023	Professor Marcus Maurer is joined by Dr Jie Li to discuss the role the gut microbiome plays in the disease progression of CSU. A particular focus is given to metabolism and homeostasis in patients with CSU, how the gut microbiome can impact CSU presentation, and the impact it can have on the efficacy of treatments such as antihistamines.	56
Episode 57: The Importance of the Chronic Urticaria Registry (CURE)	Pavel Kolkhir	Germany	02.03.2023	Dr Pavel Kolkhir joins Professor Marcus Maurer to discuss the Chronic Urticaria Registry (CURE). The discussion includes explanations of the aims of CURE in collecting quality, real-life data on chronic urticaria patient characteristics, the course of disease, underlying causes, comorbidities, treatment responses, quality of life impairment and health care costs.	57
Episode 58: Symptomatic dermographism in Chronic Urticaria	Melba Munoz	Germany	20.03.2023	Professor Marcus Maurer is joined by Dr Melba Munoz to take a deep dive into symptomatic dermographism. The discussion aims to explain the involvement of mast cells in CSU patients and attempts to answer some ongoing questions to help unravel the pathogenesis of dermographism in chronic urticaria.	58

Episode 59: Biomarkers in Chronic Urticaria	Murat Türk	Turkey	06.04.2023	Dr. Murat Türk has joined Professor Marcus Maurer to discuss biomarkers in chronic spontaneous urticaria (CSU), focusing on immunoglobulin E (IgE) in particular. They emphasise the importance of using IgE testing appropriately in the treatment of CSU; as a prognostic parameter rather than a diagnostic technique. The discussion expands into a comparison between basophil testing and IgE testing and explores the implications of these results for patients with CSU.	59
Episode 60 - Updates from AAAAI Conference 2023	Luis Ensina	Brazil	25.04.2023	Professors Marcus Maurer and Luis Felipe Ensina deliberate on the most recent findings that emerged at The American Academy of Allergy, Asthma & Immunology (AAAAI) conference held in San Antonio, Texas. In particular, Professor Maurer discusses poster presentations concerning the efficacious use of omalizumab and dupilumab for the management of urticaria. Professor Ensina expands the discussion by outlining ongoing projects and upcoming projects within UCARE that will be presented at the forthcoming UCARE conference in São Paulo in 2023.	60
Episode 61: Bruton's tyrosine kinase inhibitors in the treatment of CSU	Luisa Karla Arruda	Brazil	05.05.2023	Professor Karla Arruda and Professor Marcus Maurer discuss the development and implementation of UCARE in Brazil, and its potential benefits for individuals suffering from chronic spontaneous urticaria (CSU). The conversation extends towards exploring the framework of the Brazilian UCARE centres and projects, and how it can be implemented in other countries. Professor Maurer delves into the clinical efficacy, advantages, and impact on patient quality of life of utilising Bruton's tyrosine kinase inhibitors for the treatment of CSU, along with further discussion of alternative treatments.	61

<p>Episode 62: The role of angioedema in the treatment of CSU</p>	<p>Marc Riedl</p>	<p>USA</p>	<p>30.05.2023</p>	<p>Professor Marcus Maurer is accompanied by Professor Marc Riedl to delve into the symptomatology and pathophysiology of angioedema in chronic spontaneous urticaria (CSU). The mechanistic aetiology of angioedema within the context of CSU pathology is also explored. Professor Marc Riedl examines therapeutic treatments for patients concurrently experiencing angioedema in CSU while exploring how the characterisation of autoimmune and auto allergic pathophysiological mechanisms can impact treatment decisions.</p> <p>Do you have suggestions for future episodes? Please provide feedback and offer your suggestions for future topics and expert selection here.</p> <p>For more information on all UCARE activities please visit: https://ga2len-ucare.com/ and utilise the following external links to access additional resources relating to the topics discussed in this episode:</p> <p>Angioedema - Ten Questions, Differences and Similarities in the Mechanisms and Clinical Expression of Bradykinin-Mediated vs. Mast Cell-Mediated Angioedema, WAO/EAACI guideline for HAE, The international EAACI/GA²LEN/EuroGuiDerm/APAAACI guideline for the definition, classification, diagnosis, and management of urticaria, and Consensus on treatment goals in hereditary angioedema.</p>	<p>62</p>

<p>Episode 64: Urticaria - A general practitioner's perspective</p>	<p>Dermot Ryan</p>	<p>UK</p>	<p>23.06.2023</p>	<p>Professor Marcus Maurer is joined by GP Dr Dermot Ryan to discuss the role of GPs in the diagnosis and management of chronic urticaria. Professor Maurer and Dr Ryan highlight the positive impact that physicians have in limiting patient distress while increasing patient confidence, despite the time-limited interactions. They also explore the impact of mistreatment on a patient's life.</p> <p>Do you have suggestions for future episodes? Please provide feedback and offer your suggestions for future topics and expert selection here.</p> <p>Utilise the following external links to access additional resources relating to the topics discussed in this episode:</p> <p>The international EAACI/GA²LEN/EuroGuiDerm/APAAACI guideline for the definition and Clinical review: The suggested management pathway for urticaria in primary care.</p> <p>Access additional resources by signing up to Medthority and to be notified for future 'All Things Urticaria' podcast episodes!</p> <p>For more information about the UCARE/ACARE network and its activities please visit: UCARE Website, UCARE LevelUp Program, ACARE Website, UCARE 4U Website, UDAY Website, CRUSE Control App and CURE Registry.</p>	<p>64</p>
