## ***Welcome Message***

**Dear Colleague,**

### **Welcome to the 4th GA<sup>2</sup>LEN UCARE Conference!**

We are delighted to host you at this exceptional event, where scientific excellence takes center stage. Our program promises thought-provoking discussions, cutting-edge research, and invaluable insights into the world of urticaria.

Beyond the lecture halls, the GA<sup>2</sup>LEN UCARE Conference 2023 provides a unique opportunity for networking with peers, fostering collaborations, and building lasting connections. We encourage you to engage actively and make the most of this vibrant gathering of minds.

This meeting will offer the latest insights into urticaria pathogenesis, subtypes, biomarkers, comorbidities, diagnostic work up, impact of the disease and treatment, and many practical tips on how to manage urticaria and other mast cell-related diseases. In addition, a special focus will be on recurrent angioedema with a session hosted by the network of Angioedema Centers of Reference and Excellence (ACARE).

Get ready for 10 scientific sessions, oral abstract presentations, workshops, a Happy Poster Hour and more!

São Paulo, a city known for its dynamic culture and gastronomy, offers a delightful backdrop for our meeting. We invite you to explore its charms, from iconic landmarks to hidden gems, and savor the flavors of Brazilian cuisine.

Thank you for being part of the GA<sup>2</sup>LEN UCARE Conference 2023. Let's embark on a journey of scientific discovery and unforgettable experiences together!

## GA<sup>2</sup>LEN

GA<sup>2</sup>LEN, the Global Allergy and Asthma Excellence Network, was created to combat fragmentation in the European research area, ensuring excellence in EU allergy and asthma research by bringing together institutions and researchers from across the EU. The network notably put in place centralized structures and an office overseeing the multiple assets in knowledge in the different GA<sup>2</sup>LEN partners, enabling them to optimally synchronize their research efforts.

GA<sup>2</sup>LEN is now recognized worldwide as the EU's groundbreaking allergy organization.

GA<sup>2</sup>LEN's vision is further reduce the burden of allergic diseases in Europe and worldwide by improving the health of patients with allergic diseases; increasing the competitiveness and boosting the innovative capacity of EU health-related industries and businesses while addressing health issues including emerging allergies.

To this end GA<sup>2</sup>LEN has launched a program for the development, interaction and accreditation of centers of reference and excellence (CORES) in special areas of allergy. These centers are specialized in Urticaria (UCARE), Angioedema (ACARE), Atopic Dermatitis (ADCARE), Anaphylaxis (ANACARE) and Allergic Rhinitis (ARIACARE).

## UCARE

UCARE was the first Core to be launched in 2016. Since its inception in 2016, the UCARE network has grown to over 160 member Centers in more than 40 countries. Today it is the biggest and most active consortium of urticariologists and urticaria centers with the largest global reach to patients affected by urticaria and its comorbidities. The main aims of GA<sup>2</sup>LEN UCAREs are to provide excellence in urticaria management, to increase the knowledge of urticaria by research and education, and to promote the awareness of urticaria by advocacy activities. To this end, UCARE has launched both the physician education platform UCARE LevelUp as well as the patient education platform UCARE4U. UCARE hosts the UCARE Conference as well as the Global Urticaria Forum (GUF) in alternating years, as well as the annual Urticaria Day (UDAY) on October 1. Our vision is to increase the quality of life of all patients affected by urticaria by excellent medical care and research that improves our understanding of urticaria and its treatment, thereby empowering both patients and physicians to take control of all aspects of urticaria.
